**DEPARTMENT OF DEFENSE CHAMPUS AMBULATORY CARE
FOR PATIENTS LESS THAN 18 YEARS: FISCAL YEAR 1994**

SUMMARY

This report presents a cost and utilization summary of Fiscal Year (FY) 1994 CHAMPUS ambulatory care in the Department of Defense (DOD) for patients less than 18 years of age. The report was prepared at the request of the Office of the Assistant Secretary of Defense for Health Affairs.

The ambulatory professional services records and Program for the Handicapped services records analyzed in this study were extracted from the Tri-Service CHAMPUS Statistical Database Project (TCSDP) Main Relational Database. DOD claim records with payment dates from October 1, 1993 through September 30, 1994 were extracted. Data were summarized by program (handicapped or other) and ICD-9-CM diagnosis code. Any records which were zero for the three amounts--total government payment, total patient payment, and total amount allowed--as well as those where the fiscal intermediary denied the claim, were deleted prior to summation.

Results of the analysis are presented in Appendices A and B. Appendix A summarizes ambulatory care provided under the Program for the Handicapped while Appendix B summarizes all other ambulatory care. Shown in each table are ICD-9-CM diagnosis codes and names; the numbers of professional visits and services; and the total amounts that were billed, paid by the government, paid by the patient, and paid by other sources for the professional services.
